## **New Safety Recall Advanced Communication – U39**

FCA US LLC (FCA US) has announced a safety recall on certain 2018 model year (KL) Jeep® Cherokee vehicles equipped with the 2.4L (ED6, ED8) engines.

VINs identified as being involved in this campaign are currently live and searchable.  
**Stop sale is in effect for the above-identified vehicles.**

**IMPORTANT:** Some of the involved vehicles may be in dealer new vehicle inventory. Federal law requires you to complete this recall service on these vehicles before retail delivery. Violation of this requirement by a dealer could result in a civil penalty of up to \$21,000 per vehicle. Involved vehicles can be determined by using the VIP inquiry process.

### **REASON FOR THIS SAFETY RECALL**

Some of the above vehicles may have been built with a skived fuel tube, which may result in a fuel leak and potentially a subsequent engine compartment fire. An engine compartment fire could result in thermal or smoke inhalation injuries to occupants and/or bystanders.

### **SERVICE ACTION**

FCA US will conduct a voluntary safety recall to inspect and replace the fuel line as needed. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 2nd Quarter of 2018.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
